Dated: October 10, 2025

Circular

Sub: Call for the entries for AIDA Annual Awards, 2025

Greetings from All India Discoms Association (AIDA)!

All India Discoms Association (AIDA) was registered as not-for-profit charitable society in December, 2024. To celebrate the completion of its one year in existence, it has been planned to organize an Annual Conference (tentatively scheduled in January, 2026).

2. With the objective to recognize and motivate the good work and innovations by Member Discoms, it has also been planned to present AIDA Annual Awards, 2025 in the Conference. It is expected that recognizing the initiatives taken by Member Discoms will enhance the positive public perception about the discoms.

3. This year, it is proposed to give two awards (First and Second) in the following five categories:-

- I. Highest improvement in recovery of revenue in FY 25 in a rural circle or equivalent area and the innovative methods deployed for the same.
- II. Best use of smart meter data by Discoms for the purposes other than billing.
- III. Highest improvement in FY 25 in consumer satisfaction in terms of digital payment in a Discom.
- IV. Innovation in Energy Transition and RE integration.
- V. Agriculture feeder solarization.

Category-wise description of entries to be submitted for these awards is enclosed.

4. A Jury of renowned external four experts has been up to evaluate the entries for the awards.

5. Following are the general instructions regarding these awards:

- (i) These awards will be open to all the Member Discoms of AIDA;
- (ii) A Member Discom can submit up to three entries in the first category;

Contd.2/-

- (iii) Each entry should be forwarded by the CEO/MD of the Discoms concerned;
- (iv) There is no entry fee;
- (v) The Jury can call the concerned Discom to make a presentation through its senior representative;
- (vi) Each entry should contain (a) A brief summary of not more than 500 words; (b) Details of the work done/innovation and the area in which it has been implemented along with the relevant data and its sources in the form of a PPT of 20-25 slides, and (c) Photographs, video or any other material related to the subject matter of the entry;
- (vii) The Jury will have the discretion of modifying the criteria for assessment depending upon the information provided in the entries.

Any clarification in this regard may be sought from AIDA Secretariat preferably by 31st October, 2025.

6. All Member Discoms are requested to proactively participate by submitting entries for these awards as it will go a long way in motivating the discom personnel. Entries can be sent to AIDA Secretariat latest by 30th November, 2025. Soft copy of the entries may please also be emailed at info@aida-india.org latest by 30th November, 2025.

Category-wise Description of Entry for Awards

Category-I: Highest improvement in recovery of revenue in FY 25 in a rural circle of equivalent area and the innovative methods deployed for the same:

The objective of this award is to identify the innovations being deployed in rural areas for improving the collection efficiency. Assessment of the entries will be done on the basis of innovativeness of the interventions, and the improvement achieved over the previous year. Innovation may have started 2-3 years ago but it should be sustainable and replicable. The entry should also explain the cost involved in the innovative method(s) deployed and the benefits obtained in terms of additional revenue collected.

Category-II: Best use of smart meter data by Discom for purposes other than billing:

The entries in this category shall be assessed on the basis of actual utilization of smart metering data (beyond billing) for purposes like asset management, theft detection, load research etc. and the quantifiable benefits being derived by the Discom. Usage of Smart metering data from Distribution Transformers for predictive maintenance, network loss reduction etc., should also be included. Internal capabilities developed and the steps taken for institutionalizing the same at various levels will also be considered in the assessment.

Category-III: Highest improvement in FY 25 in consumer satisfaction in terms of digital payment in a Discom:

The entries in this category will be assessed on the basis of the percentage increase in number of the consumers using digital payment modes for their monthly electricity bills and the incentives/ awareness measures taken by discom for the same. Increase in consumers adopting prepaid payment mode should also be included in this percentage. Special consideration will be given for the improvements in the smaller towns/ rural areas excluding the municipal corporation towns. Hence, the figures of improvement may be given with breakup accordingly.

Category IV: Innovation in Energy Transition and RE Integration:

The entries should describe the roadmap drawn and steps taken to implement the roadmap for increasing the share of non-fossil based electricity input at the periphery of the distribution network of the Discom. These will be assessed on the basis of increase in this percentage in the last three years, and the energy assessed to be made available by end of FY 27 from the PPAs already contracted.

Category V: Agriculture feeder solarization:

The entries in this category should give the details of supply feeders which have agricultural load (contracted demand) more than 30 percent of the total load on the feeder. A feeder will be taken as solarized if the installed capacity of solar generation is more than fifty percent of the contracted load. The installed capacity may include both the actual installed capacity and the capacity for which PPAs have been signed (with SCOD in next 18 months), and the projects of solar installations sanctioned for individual farmers on the feeder with a list of beneficiaries issued for subsidy entitlement. The entries will be assessed based on a combined achievement in terms of percentage of total agricultural feeders covered as per above criteria, and the percentage of solarized capacity with respect to total contracted load on all the agricultural feeders of the Discom.

Category VI: Effective Change Management for Improvement in Consumer Services

Discoms are making changes from time to time to their internal structures and processes to deliver better services to the consumers and also achieve cost efficiency. The entries in this category should give details about the changes made, time taken from planning to full implementation, and the extent of improvement in consumer services. The entries will be assessed on the basis of recency of the initiatives, speed and scale of the changes made and the measured improvement in services to consumers in terms of quality of services and the satisfaction level of consumers in interaction with discom interfaces.
